QRIS, Licensing and Accreditation: The Keys to Creating a Continuous Quality Improvement Culture in your ECE Program

Debi Mathias

dmathias@buildinitiative.org
Agenda

- Welcome
- CQI Definition
- CQI Process and Philosophy
- Challenges in the Work
- Role of the Program Leader in CQI
- Ready for Change
Welcome

Debi Mathias
Director
QRIS National Learning Network
POLL

Who is Here Today?
Historical Context

- What's in a name?
- From work support to school readiness
- NAEYC as the north star
- Indicators from Federal Government
- Brain Research
- Movement to standards based
- ECE Systems Building-QRIS
- Accountability, ROI and Results
- Using Research to inform practice
Principal Elements of Quality

- Highly skilled providers
- Age-appropriate curricula and stimulating materials in a safe physical setting
- A language-rich environment
- Warm, responsive interactions
- High and consistent levels of child participation
- Small class sizes and high adult-to-child ratios

-Center on the Developing Child   Harvard University
“One major purpose of a QRIS is to recognize quality and promote a culture of continuous improvement among providers. The rating is not a destination; it is a set of benchmarks along a pathway of ongoing improvement.”

Anne Mitchell,
Considerations for an Efficient, Inclusive and Implementable Quality Rating and Improvement System
April, 2012
What should be included in a definition of CQI?
What Is Continuous Quality Improvement (CQI)?

The process of:

• Identifying strengths and weaknesses
• Establishing a plan
• Testing and implementing
• Evaluating the results
CQI Philosophy

- Grounded in the overall mission and vision of the program
- Dependent on the active involvement of stakeholders
- Programs can be improved
- Provide the best possible services and outcomes
- Plan based on objective data
- CQI is an ongoing process
- CQI at all levels of an organization
How to live CQI

- Use the continuous quality improvement model to make small incremental changes
- Most effective when it becomes a natural part of the way everyday work is done

“Change that lasts is slow and gradual.”

Kaizen
There are so many standards, regulations and guidelines….

- Working within different systems
- Highest standard
- Crosswalk
Ideas to Manage

• Organization
• Divide and conquer
• Living high quality
• Resources
• Other ideas
Change is a Process

Moving from compliance to CQI involves exploring and shifting:

• Attitudes and philosophies
• Identifying current practices – what works & what doesn’t
• Clarifying Visions & Goals
• Specifying Criteria for Success
• Developing & Implementing Plans – based on objective data
• Continuously Dealing With Challenges
• Modifying Plans & Continuous Reflection
Continuous Quality Improvement Process

Vision
Plan
Do
Act
Study

Do Study Plan Act Vision
Develop a Shared Vision

- Define what you truly want to achieve - develop a shared picture of the future
- What are the expectations of outcomes for children and learning?
- For professional practice and staff development?
- How are we strategically using our program resources?
- How do we support a continuous learning ethic?
- How do we support quality and develop effective leadership at all levels?
Essential Elements of a CQI Plan

• Identify and engage the team
• Identify the sources of evidence
• Write clearly defined and measurable goal statements
• Outline a series of action steps
• Identify who is responsible for the activity and follow up (execute)
• Time period for goal completion
• Resources and supports needed
Plan

Define, analyze and evaluate the current process and results using a variety of sources of evidence

Ask:

• What is working well?
• What are the challenges?
• What are the data and sources of evidence telling us?
• What is the research telling us?
• What do we want to change?
• What is the current process for improving our results?
• How will we know if our plan is successful?
Implement the Plan Ask:
• Are the timelines working?
• Is our follow up and implementation disciplined?
• How do we embed practices and follow up throughout the year?
• Are we executing the plan?
Study

Evaluate, track and reflect on how the process for improvement is working and the results of the implementation efforts.

Ask:

• How is the process working?
• Was our plan successful?
• What still needs improvement?
• Are there mid course adjustments needed?
Act

- Incorporate changes into the CQI process
- Revise policies to support the changes
- Develop strategies to embed the improvements into operations
- Celebrate successes and
- Begin again......
POLL
Identifying Challenges

• What are challenges of creating a CQI culture at the program level?
“The organizations that will truly excel in the future will be the organizations that discover how to tap people’s commitment and capacity to learn at all levels in an organization.”

Peter Senge
Experts: Director and Teaching Staff

• About their programs
• About the children and families in their classrooms
• About what they do everyday
• About their work environment
Directors as Change Agent and CQI Process Facilitator

What are the skills and abilities the Director needs to develop a culture of CQI within a program?
THE COMPONENTS OF EXEMPLARY ORGANIZATIONS
BUILDING A CENTER OF QUALITY

CONTINUOUS IMPROVEMENT

OUTCOME-FOCUSED
HIGH EXPECTATIONS
INVOLVEMENT
ASSESSMENT & FEEDBACK

DATA-DRIVEN DECISION MAKING

TRUST

SHARED VALUES AND GOALS

Adapted from the Center for Instructional Effectiveness/Datatel
McCormick Center for Early Childhood Leadership | National Louis University
TWO SIDES OF ORGANIZATIONAL CHANGE

The hard side of change

... is about measurement, timelines, procedures, and securing resources

The soft side of change

... is about vision, attitude, buy-in, commitment, creativity, and overcoming resistance

MANAGEMENT

LEADERSHIP

McCormick Center for Early Childhood Leadership | National Louis University
Preparing to Lead Change

How would a leader go about developing these abilities?
Continuous Improvement = CHANGE

DIRECTOR AS AGENT OF CHANGE

The 5 Stages of Change Model

Process though distinct, predictable steps

Readiness to change is contextual

Readiness to change can vary in different parts of life

Realizing the stage of change you’re in may help you succeed AND can help you motivate and facilitate others through change
What Are the Stages of Change?

- Stage 1: Precontemplation
- Stage 2: Contemplation
- Stage 3: Preparation
- Stage 4: Action
- Stage 5: Maintenance

1. At this stage there is no intention to change behavior in the foreseeable future.
The Stages of Change

CONTEMPLATION

2. In this stage people are aware that a problem exists and are seriously thinking about overcoming it but have not yet made a commitment to action.
The Stages of Change

PREPARATION

3. This stage combines intention and behavioral criteria. People at this stage are intending to take action in next month and have successfully take action in the past year.
5. In this stage people modify their behavior, experiences, or environment in order to overcome their problems.
5. In this stage people work to prevent relapse and consolidate the gains attained during action.
6. Relapse is the resumption of old behaviors.
What is CQI?
CQI is:

- A shift from a focus on the end product to process.
- A shift from externally driven (compliance) to internally motivated
CQI is:

- Seeing the “customer” as a specific person with a specific need
CQI is:

- The responsibility of every employee at every level of the organization
CQI is:

- Balance between individual effort and team effort.
CQI is:

• Teachers, Board, Families and Children involved in decisions.
CQI is:

- Not a destination but a journey.
CQI is:

• To get better and better at getting better and better...
