The Science of Dual Language Learning for Children Birth Through Age Five: Effective Practices that Improve Outcomes

Linda M. Espinosa, Ph.D.
Early Childhood Investigations Webinar
May 11, 2016
Who is a Dual Language Learner? Terminology Matters!

- Dual language learners are young children learning two or more languages at the same time, as well as those learning a second language while continuing to develop their first (or home) language.

- Includes simultaneous and sequential, successive
Diverse group that is growing—in size and diversity of backgrounds…

- More than 30% of children enrolled in Head Start live in households where English is not the primary language (ACF, 2013)
- 15% of K-12 Enrollment in U.S (2011, NCES);
- 27% of all children in U.S. born in DL homes; most speak Spanish (80-85%)
Diversity Within the DLL Population

- Countries of origin; family cultures
- Immigrant vs non-immigrant experience
- Exposure and opportunities to learn in home language & English
- Socioeconomic status and parental education
POLL #1
Who are dual language learners and what do we know about their development and achievement?

Developmental Paradoxes!!
POLL #2
“...young DLL children may know certain words in the home language, but not in English, and as a result, they may have a smaller vocabulary than English or Spanish monolinguals. For example, they may know the names of objects in the kitchen and home in Spanish but not in English. In these cases the child may look like he has limited vocabulary in each language.”

* In Challenging Common Myths About Young Dual Language Learners: An Update to the Seminal 2008 Report Page 17
POLL #3
Recent studies from cognitive neuroscientists have found differences in brain activity in the areas of the brain that process language across bilingual and monolingual PreKindergarteners. Young bilingual children develop more widely dispersed and evenly distributed neural pathways across both brain hemispheres.

In Challenging Common Myths About Young Dual Language Learners: An Update to the Seminal 2008 Report Page 8
POLL #4
These studies have also demonstrated that knowing more than one language does not delay the acquisition of English or impede academic achievement in English when both languages are supported. Research on children who learn English after their home language has been established—usually around three years of age—has also shown that most young children are capable of adding a second language and that this dual language ability confers long-term cognitive, cultural, and economic advantages.

* In Challenging Common Myths, page 6
POLL #5
Even when teachers do not speak the child's home language, there are many specific teaching practices that will support continued development of the home language. Teachers and ancillary staff can support children’s home language throughout the day in all kinds of learning situations;... they can also train parents, community members, and volunteers to work with DLL children in their home language.

In Challenging Common Myths About Young Dual Language Learners: An Update to the Seminal 2008 Report Page 12

2. National Academies of Sciences: Report on Fostering the Success of DLLs, Birth to 18 (in process)

3. Center on Early Care and Education Research-Dual Language Learners: 30 products on DLLs

   http://cecerdll.fpg.unc.edu/
Children from Low-income and Dual Language Families Highly Vulnerable to Underachievement

- NAEP Scores
- State Achievement Data
- K Entry Data
- High School Completion
- College Enrollment
How Much of Achievement Gap is Due to Language Status (DLL) vs Poverty vs Cultural/Linguistic Discontinuity??
Dual Language Learners are Very Diverse

• **Context Matters!**
  - SES
  - Country of origin
  - Languages spoken
  - Age of exposure
  - Quantity and quality of language inputs
  - Opportunities to use language
Having a second language is sometimes linked to higher achievement in English... ECLS-K data analysis.

Espinosa, et al., 2007
“The combination of living in poverty and having limited access to early education increases the vulnerability of young DLLs to negative outcomes.”

*Castro, Espinosa, & Paez, (2011)*

*Having more than one language during ECE years should not be considered a risk factor!!*
What WE Do in ECE Programs (from bus rides to meals to storybooks) Will Have Long-term Benefits for Children.
Young DLLs Often Underserved or Inappropriately Served

- Missed opportunities
- Unrealized potentials
The Science of Early Bilingualism

1. Capacity of Young Children; Age of Exposure

2. Benefits/Differences:
   Cognitive, Social, Linguistic, Executive Function Skills, Family Dynamisms Vocabulary

3. Need to Support Both Languages

4. Families are Critical Partners
Infant Brains & Bilingualism: Study Methods
Research Base

• Brain development of young bilinguals:
  – Different than monolinguals
  – Two linguistic systems develop
  – At birth, can perceive all phonemes in all languages; by 10-12 months phonemic pruning has occurred
The ‘critical period’ for language

Age of Acquisition of New Language

Language Score

Native 3-7 8-10 11-15 17-39

High Low
Cognitive Development*

Young bilinguals show advanced skills in non-verbal executive control skills….detectable at 7 months!

✓ inhibitory control (ability to resist a habitual response or information not relevant)

✓ working memory or updating (ability to hold information in mind and mentally manipulate it)

✓ cognitive flexibility (ability to adjust to changes in demands or priorities and switch between goals)

Language and Literacy Development of DLLs*

- Timing: age of exposure
- Amount and quality of exposure
- Opportunity to use and practice

Vocabulary development looks different: longer lexical retrieval time

Smaller vocabularies in each language; conceptual vocabularies when combined in 2 languages comparable

Speech production somewhat slower

Grammatical development differed

Cross-language (L1-L2) influences varied by similarities of 2 languages
Children of Mexican immigrant families tended to have more social-emotional competencies (initiative and self-control) and fewer behavior problems than nonimmigrants at K entry.

Balanced bilingualism necessary for cognitive, linguistic benefits

Bilingual advantages found across cultural and SES groups
Children need opportunities to hear, process, and use language during meaningful interactions.

Research suggests I/Ts need sufficient time with high quality input in language to learn it.
Child care appears to be especially beneficial for DLLs: larger gains than other children

- in center-based care
- in high quality care
- when home language is spoken in setting

Evidence suggests DLLs are less likely to

- be in child care before Pre-K
- be enrolled in center-based care before Pre-K
- experience high quality care or use home language in center care

Importance of Supporting Both Languages

- Frequently early English exposure leads to loss of home language
- Carefully balanced language approach is needed during early years
- Learning English is important, but should not come at the expense of continued development in first language
What does this mean?

- DLLs should not be expected to perform like monolinguals: different patterns of development
- Initial differences may look like delays; DLLs need time and language learning opportunities to become proficient in both languages
- Bilinguals cannot be compared to monolingual norms when assessing children
Need to revise and implement improved policies and practices birth to eight that reflect the current research on bilingual development and the realities of local contexts.
State Early Learning and Development Standards/Guidelines, Policies & Related Practices

How responsive are they to the needs of young dual language learners?

Linda M. Espinosa, Ph.D.
Miriam Calderon, MSW

October 2015

A thanks to the
W.K. Kellogg Foundation and the Richard W. Goldman Family Foundation
for their support of BUILD’s work
to advance racial equity for our youngest children.
**Challenge:** How do we support home language development and promote English language development with multiple languages of children/families, monolingual teachers, different educational contexts?
Program Approaches, Interaction and Instructional Strategies that Promote Improved Development and Achievement for DLLs

First--- Warm, Responsive, Enriched Interactions and Good Instructional Practices Help Dual Language Learners (but are not sufficient)

Goldenberg, et al., 2013
Considerations When Implementing a Language Model for Pre-K DLLs

• **Language Goals**: Dual language or balanced approach with explicit bilingualism and bi-literacy goals?

• **Staffing Capacity**: Language abilities of program staff, families, community
**First Step**

- Early in the year or at registration have a conversation with parents:
  - Collect information on child’s earliest language experiences, current language opportunities, family feelings about maintaining home language, family interests and talents
  - Record and use information
  - Conduct in family’s preferred language (may need to hire an interpreter)

*Important for establishing rapport, respect, and common focus on child’s well-being; Building relationship based on trust*
Sample Family Languages and Interests Survey

Are your feelings about maintaining your home language? ______________________________________

tage was your child first exposed to English? ____________________________________________

Does your child play with most often? ____________________________________________________

i have any hobbies or interests that you would like to share with your child’s class? ________

you be interested in volunteering in your child’s class? ________________________________

preferred day and time ____________________________
DLL program considerations...

- **Structure of program**: Who will speak which language and for what purposes? 50-50, 90-10, 75-25?
  
  Or

- **ELD with home language support**: Each requires careful planning and frequent monitoring.
Develop initial language goals for child:

E.g., if child has very little English and is mostly listening and following others or using only one-word responses, then design many opportunities for child to build receptive language skills and minimize demands for child to speak English publicly

Must know child’s stage or level of English acquisition
## Examples of Phases of Second Language Acquisition

<table>
<thead>
<tr>
<th>Phases of second language acquisition</th>
<th>Example</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Home Language</strong></td>
<td>William is on the sand table. He asks an English-speaking child, “¿Me das la pala?”</td>
<td>Linda asks the teacher, ¿Cuándo vamos a comer el lonch?</td>
</tr>
<tr>
<td><strong>Quiet period</strong></td>
<td>Yazmin looks intently to the teacher and remains quiet while the teacher is reading a book aloud in English.</td>
<td>Jessica holds the teacher’s hand to show her something interesting she has discovered in the classroom.</td>
</tr>
<tr>
<td><strong>Telegraphic/Formulaic Speech</strong></td>
<td>Francisco uses expressions such as “come on” to invite other children to play in the playground.</td>
<td>Antonio tells to one of his classmates: “Two people” to indicate that only two people can be in the housekeeping area.</td>
</tr>
<tr>
<td><strong>Productive Speech</strong></td>
<td>Rogelio announces after being in the playground, “I sandbox in shoe.”</td>
<td>Jessica tells the teacher, “Carlos es mi friend.”</td>
</tr>
</tbody>
</table>
Setting Up the Environment

- Labeling in both languages (color coding)
- Visual cues pictures and graphics
- Word walls in both languages
- Daily schedule with pictures and both languages represented
Example of Daily Routine

How to wash your hands...

1. Wet your hands.
2. Use soap.
3. Scrub your hands.
4. Rinse with water.
5. Dry your hands with a towel.

Cómo lavar las manos...

1. Moja las manos.
2. Usa jabón.
3. Frote las manos.
4. Enjuaga con agua.
5. Seca las manos con una toalla.
Example of Daily Schedule

- Centers/Centros
- Morning meeting / Junta de la mañana
- Groups/Grupos
- Recess/Recreo
- Story time / La hora del cuento
- Lunch/Almuerzo
Language, Any Language, is the Foundation for Literacy.......and Literacy in English is Critical for School Success

**Focus on oral language** (extended vocabulary, grammar, narratives, listening comprehension, academic language)

**Explicit/intentional teaching of some language and literacy skills** (phonemic awareness, vocabulary)

**Grouping practices important** (small, instructional groups, structured pairings)
Best Practices/Strategies...

- Anchor book, intentional message, vocab. Imprinting, songs, chants, visual cues/gestures
- Skilled Story Book Reading (specific strategies that build vocab and narrative)
- Bring home language into classroom
- Opportunities to Practice Across Contexts
- Screening and Continuous Assessment
- Strong Parent-Family Partnerships (home visiting, parent-school collaborations, parent education, family support programs)

From Espinosa (2015), Getting It Right for Young Children from Diverse Backgrounds, Chapter 4
And CPPG (2015), DLL Chapter
How to Support Home Language While Promoting English Language Development

• **Set of Strategies** that Bridge between home language (L1) and English:
  – Cognate charts
  – Front-loading vocabulary in home language
  – *Use of photos and pics*
ALL ECE Practitioners Can Support ALL Languages

• If possible, hire qualified bilingual teachers, family liaisons, and assessors
• For monolingual, English speaking teachers there are many strategies to provide rich learning opportunities in each language
  – Bring home language into setting (family, volunteers, community reps.), authentic bilingual materials, music, CDs, activities
  – videos
“……young dual language learners are learning through two languages and both languages must be supported through intentional instruction, specific language interactions, frequent assessments of children’s progress in both languages, and culturally sensitive engagement with families.”

From CA Preschool Program Guidelines, 2015
Conclusion

While all ECE teachers cannot instruct in all languages, all teachers can support all languages by working with families and using specific strategies that bring home language and culture into ECE settings.
Thank You
