Empowering DAP Strategies for Literacy in Early Childhood Programs
Nell K. Duke
University of Michigan

Session Objectives
Administrators:
• learn about fundamental knowledge their staff should have about literacy development
• learn about specific practices their staff can use to promote children’s literacy development in developmentally appropriate ways
• identify professional development strategies for developing their staff’s capacity in early literacy

Developmentally Appropriate Practice (DAP)

Developmentally Appropriate Practice in Early Childhood Programs Serving Children from Birth through Age 8: A position statement of the National Association for the Education of Young Children, 2009
Defining DAP

“Practice that promotes young children’s optimal learning and development” (p. 16)

Myths about DAP

There are so many. Here are three:
1. DAP means no explicit teaching.
2. DAP means all play all day.
3. DAP means all experiences have to be initiated by children based on what interests them.

“Good teachers acknowledge and encourage children’s efforts, model and demonstrate, create challenges and support children in extending their capabilities, and provide specific directions or instruction. All of these teaching strategies can be used in the context of play and structured activities. Effective teachers also organize the classroom environment and plan ways to pursue educational goals for each child as opportunities arise in child-initiated activities and in activities planned and initiated by the teacher.”
Literacy is Not the Be All and End All

“All the domains of development and learning—physical, social and emotional, and cognitive—are important, and they are closely interrelated. Children’s development and learning in one domain influence and are influenced by what takes place in other domains.” (p. 11)

Session Objectives

Administrators:
• learn about fundamental knowledge their staff should have about literacy development
• learn about specific practices their staff can use to promote children’s literacy development in developmentally appropriate ways
• identify professional development strategies for developing their staff’s capacity in early literacy

Knowledge of Standards

Teachers need to know the relevant standards. Examples for literacy from the Head Start Outcomes Framework 2015:
• Names 18 upper- and 15 lower-case letters.
• Knows the sounds associated with several letters.
Knowledge of Standards

Example for literacy from the Head Start Outcomes Framework 2015:

- Re-tells or acts out a story that was read, putting events in the appropriate sequence, and demonstrating more sophisticated understanding of how events relate, such as cause and effect relationships.

Knowledge of Standards

Examples for literacy from the Head Start Outcomes Framework 2015:

- Produces the beginning sound in a spoken word, such as “Dog begins with /d/.”
- Provides a word that fits with a group of words sharing an initial sound, with adult support, such as “Sock, Sara, and song all start with the /s/ sound. What else starts with the /s/ sound?”

Why is initial phoneme segmentation so important?

- Children need it to write:
  
  I l M
  (I love Mom.)

- Children need it for keyword instruction to make sense:
  
  “A is for apple”
  “Z is for Zeshawn”
An Approach to Unpacking Standards

Knowledge of Content
The Case of Quality Key Words

- The word should have the key sound, or one of the two key sounds, of the letter.
  *For example, not A is for Airplane*
- The word should not start with a letter name.
  *For example, not E is for Elephant*
- Generally, the word should not start with a blend because it may be harder for the child to segment.
  *For example, not D is for Drum*

- The word should be easy to depict
  *For example, apple generally works well.*
- The word should not be something that is easily confused with another item that begins with a different sound.
  *For example, b is for boat can be problematic because kids may be inclined to say, "ship."
- The word should be likely to be known to or easily learned by children, which will vary depending on children’s backgrounds.

PLC Activities

Knowledge of Children

• Children’s
• interests
• experiences
• cultural and linguistic background(s)
• points in development
• strengths
• needs
Knowledge of Children
Case of the Need to Understand Cultural and Linguistic Background

In English, readers read from left to right and have a return sweep at the end of each line.

Knowledge of Children
Case of the Need to Understand Cultural and Linguistic Background

In Arabic, readers read from right to left and have a return sweep at the end of each line.

Knowledge of Children

• Children’s interests
• experiences
• cultural and linguistic background
• points in development
• strengths
• needs
• Child development
Knowledge of Children
The Case of Vocabulary Acquisition

- Children may need many exposures to a word in different contexts in order to learn it.
- Nonverbal supports can be very helpful.
  - for example: videos, photos, movement, props, experiences
- Non-examples can be very helpful.

Session Objectives

Administrators:
- learn about fundamental knowledge their staff should have about literacy development
- learn about specific practices their staff can use to promote children’s literacy development in developmentally appropriate ways
- identify professional development strategies for developing their staff's capacity in early literacy

Example Practice to Develop Literacy
Print-referencing Read Aloud

Print referencing is a research-supported instructional practice for preschool (e.g., Justice & Ezell, 2002; Justice, McGinty, Piastra, Kaderavek, & Fan, 2010).

Print referencing involves verbal and non-verbal strategies for drawing children's attention to print during adult-child read aloud.
**Example Practice to Develop Literacy**

**Print-referencing Read Aloud**

- running finger under words
- pointing out, or engaging children in pointing out, where to start reading
- pointing out letters and their associated sounds
- pointing out other features of print
- pointing out print within pictures
- counting words

---

**Example Practice to Develop Literacy**

**Interactive Writing**

Interactive writing is a research-supported instructional practice for preschool (e.g., Hall, Toland, Grisham-Brown, & Graham, 2014).

Interactive writing involves the teacher leading the writing and the children contributing much of the content and some of the writing.

Example Practice to Develop Literacy
Literacy-enriched Dramatic Play

Play provides a context for developing literacy (e.g., Neuman & Roskos, 1992; Roskos, Christie, Widman, & Holding, 2010).

There are specific practices we can use to increase literacy development opportunities within play.

Example Practice to Develop Literacy
Literacy-enriched Dramatic Play

We can enrich every area of the classroom in which children play with materials to read and write.

Example Practice to Develop Literacy
Literacy-enriched Dramatic Play

Generating ideas for this can be a PLC Activity
Example Practice to Develop Literacy

Literacy-enriched Dramatic Play

Materials can be used to encourage children to develop and reenact stories. For example, for *Little Red Riding Hood* and variants:

- Basket
- Red hood
- Some way to symbolize a forest
- Something like a bed
- Wolf mask

Generating ideas for this can be a PLC Activity

Example Practice to Develop Literacy

Literacy-enriched Dramatic Play

Materials can be added to a dramatic play area that are authentic to that dramatic play theme. For example, for a farmer’s market:

- vegetables and fruits
- seed packets
- pots
- baskets
- labels for food
- pads of paper
- pencils
- play money
- garden-supply catalogs

Generating ideas for this can be a PLC Activity

PLC Activities

As You Read Through the Document on the Previous Slide:

- **Read for detail.** Every single bullet—arguably every single word—is there for a reason.
- **Read for affirmation.** Some items will be things your staff is already doing.
- **Read for improvement.** Some items, perhaps many items, will be things your staff could improve on.
- **Read for research.** See the endnotes for references to research studies that support each practice. Research, not philosophy.

Session Objectives

Administrators:

- learn about fundamental knowledge their staff should have about literacy development
- learn about specific practices their staff can use to promote children's literacy development in developmentally appropriate ways
- identify **professional development strategies** for developing their staff's capacity in early literacy
Effective Professional Development

Desmione, 2009

Concludes that there is a consensus about five characteristics of PD that are effective:

1. Content focus
2. Active learning, for example:
   • observing expert teachers
   • being observed, followed by interactive feedback and discussion
   • reviewing children’s work related to the PD
   • discussions
3. Coherence
4. Duration (hours and span)
   • 10 hours? (Gerde, Duke, Moses, Spybrook, & Shedd, 2014)
   • 14 hours? (Yoon, Duncan, Lee, Scarloss, & Shapley, 2007)
   • 20 hours? (Desmione, 2009)
Desmione, 2009

5. Collective participation

“This feature can be accomplished through participation of teachers from the same school, grade, or department. Such arrangements set up potential interaction and discourse, which can be a powerful form of teacher learning (Banilower & Shimkus, 2004; Barko, 2004; Desimone, 2003; Pullan, 1991; Guskey, 1994; Little, 1993; Loughs-Horsley et al., 1998; Rosenholtz, 1989).” (p. 184)

---

Effective Professional Development

---

Effective Professional Development

I recommend grounding professional development in:

• The NAEYC Statement on Developmentally Appropriate Practice (2009) discussed earlier
• Research studies, when possible
• Research-informed articles, books, videos, websites (e.g., the What Works Clearinghouse), and other documents
• Curriculum materials that are strongly research-based and up-to-date
